GENERAL BUSINESS:

At the tenements meeting between all the clubs who use the Veteran Car Club rooms it was suggested that the VVCC consider installing a defibrillator in the club rooms, which then raised the issue of first aid training.

A general discussion was held regarding fire extinguishers and first aid. About half of the attendees at the meeting had completed first aid and fire training, but everyone's training was out of data.

Most attendees agreed that SCCQ member should update their first aid and firefighting training. For future organisation.

The Veteran Car Club advised that the disabled toilets that had been included in the original club house plans would be constructed in the near future.

Storage Shed at the Veteran Car Club site.

The Veteran Car Club has approached SCCQ about a 6 x 3m storage shed near the club building. For a \$4,000 up front cost SCCQ gets use of the shed rent free for 10 years.

A unanimous approval was given to investigate the shed option at the meeting.
